Profile

Computer Science Engineering student drawn to the space between **technology and people**: understanding how systems work, breaking complex ideas into intuitive concepts, and making them engaging enough to learn. Through IEEE leadership, technical workshops, and public speaking, I have worked with audiences ranging from student groups to **200+ participants**. My approach is simple: explain **why** a technology exists, build an intuitive analogy, demonstrate it practically, and let learners apply it themselves. My technical foundation spans programming, web development, DevOps, CI/CD, and Generative AI.

Technical Training Experience

Google Student Ambassador (GSA)

2025

Technical Workshop Facilitator

- Conducted a **4-hour hands-on workshop for 40+ students** on AI-assisted web development and deployment using Gemini CLI.
- Guided participants through **Terminal, Gemini CLI, Git, Vite, GitHub, and Vercel**, taking them from local development to building and deploying their own projects.

Leadership & Speaking Experience

IEEE Student Branch, ATME College of Engineering

Mar 2024 – Dec 2025

Secretary

- Coordinated student teams, planning, timelines, communication, and execution of technical activities; regularly served as a speaker and host across IEEE events.

TechAvishkar 2.0 – 24-Hour Hackathon

Core Organising Committee

- Helped plan and execute a **24-hour hackathon with ≈200 participants and 20+ jurors**; coordinated jury timelines and maintained participant engagement through late-night stages as host and audience leader.

IEEE Ignite – IEEE Logo Launch

Technical Speaker / ≈200 Audience

- Delivered a **15-minute formal presentation** on IEEE's relevance to engineering students and professionals, using student-relatable memes and humour to sustain attention and connect professional development with student experience.

IEEE Mini Project Symposium & AMC College Ideathon

Volunteer & External Speaker

- Coordinated volunteers, registration, certificates, participant flow, and jury support at the symposium; spoke at its valedictory and delivered a 5-minute external presentation on *Vayulekha*.

Technical Training Domains

Programming: Python, C, Programming Fundamentals, Basic OOP | **Web:** HTML, CSS, JavaScript, Vite, Node.js, Express.js

DevOps & Systems: Linux, Terminal, Git, GitHub, Docker, CI/CD, GitHub Actions, DevOps Fundamentals

AI & Automation: Generative AI, Gemini, Gemini CLI, LLM APIs, AI-Assisted Development, AI Application Architecture, n8n

Cloud & Databases: AWS Fundamentals, EC2, Vercel, MongoDB, MySQL

Technical Projects

MEAN Stack DevOps Deployment

2025

- Containerized MongoDB, Express, Angular, and Node.js using Docker Compose; built GitHub Actions CI/CD for DockerHub publishing and AWS EC2 deployment via SSH, with Nginx as reverse proxy.

Fixora – Autonomous CI/CD Self-Healing Engine

2025

- Built an AI-powered repository repair workflow that analyzes errors, applies patches, creates isolated Git branches, and pushes fixes automatically.

VidhiPath.ai – GenAI Assistant

2025

- Developed a MySQL-backed GenAI assistant with document processing and semantic search during the IEEE Computer Society Internship & Mentorship Program.

Education

Bachelor of Engineering – Computer Science & Engineering

Expected 2027

ATME College of Engineering, Mysuru

CGPA: 8.48 / 10

Certification

Google Student Ambassador – 2025
